NAME: ____________________________  PERIOD: ____________

**PRACTICE QUIZ - FIRST QUIZ**

Solving Two Step Equations/Inequalities

Solve each equation. (4 points each)

1) \(-3x + 11 = -13\)  
2) \(12 - 5x = 2\)  
3) \(-31 = 2x - 13\)  
4) \(20 - \frac{x}{2} = 15\)  
5) \(-14 = \frac{x}{9} - 11\)  
6) \(-2x + 19 = 3\)

Remember!!! We are looking for perfection!!!
7) \[ \frac{x}{5} - 28 = -40 \]

9) \[-2x + 3 = -25\]

8) \[3x - 11 = -25\]

10) \[13 = 18 - \frac{x}{4}\]

**Extra Credit: (2 points)**

The extra credit equation will involve mixed numbers.

Remember!!! We are looking for perfection!!!
