Notice to Parents – Use of Student Photos & Video Images

In order to conduct an effective public relations program, the Exeter Township School District shares news about activities and events that occur within the schools. To do this, names and photos of students might be placed in district publications, as well as names, photos, and video images could appear in the local media.

Respecting the right to privacy, parents/guardians are asked to notify the student's school office if there are any objections to their child's name, photo, or video image appearing in district publications (including the web site) or in the local media.

It will be assumed that parental / guardian permission for the above activities is granted for the 2019-2020 school term unless a written denial of permission is provided by the parent or guardian and on file in the child's school.
